

# 16Personalities Quiz HTML

Ich programmiere einen personality quiz, welcher auf 16Personalities basiert. Die Struktur ist so aufgebaut für den html file:

```
<div class="question">
  <p>1. In a social gathering, do you feel more energized by
  interacting with a large group of people or by having one-
  on-one conversations?</p>
  <div class="scale">
    <span class="label-left">Large group interactions</span>
    <div class="scale-options">
      <label><input type="radio" name="ei_q1" value="3">
      required<span></span></label>
      <label><input type="radio" name="ei_q1" value="2">
      <span></span></label>
      <label><input type="radio" name="ei_q1" value="1">
      <span></span></label>
      <label><input type="radio" name="ei_q1" value="0">
      <span></span></label>
      <label><input type="radio" name="ei_q1" value="-1">
      <span></span></label>
      <label><input type="radio" name="ei_q1" value="-2">
      <span></span></label>
      <label><input type="radio" name="ei_q1" value="-3">
      <span></span></label>
    </div>
    <span class="label-right">One-on-one
    conversations</span>
  </div>
</div>
```

Es handelt sich hierbei um 4 Dimensionen Extraversion/Introversion (ei) , Sensing/Intuition (sn), Thinking/Feeling (tf) , Judging/Perceiving (jp). Bitte erstelle für mich nach der selben Struktur und Logik für jede Dimension jeweils 5 Fragen, mit dem kompletten HTML Code. Richte dich nach den Fragen von <https://www.16personalities.com/free-personality-test>.

Hier ist der vollständige HTML-Codeblock für deinen 16Personalities-basierten Personality Quiz, mit **je 5 Fragen pro Dimension (EI, SN, TF, JP)** – insgesamt **20 Fragen**. Die Struktur

entspricht genau dem von dir vorgegebenen Format.

✅ **Jetzt hast du 20 Fragen** (jeweils 5 pro MBTI-Dimension) im korrekten HTML-Format für dein Quiz, mit passenden `name`-Attributen für spätere Auswertung.

Wenn du magst, kann ich dir:

- das CSS-Layout dafür vorschlagen,
- die Python- oder Flask-Logik zum Auswerten dieser Werte liefern,
- oder einen Button zum Abschicken und zur Weiterleitung einbauen.

Sag einfach Bescheid!
